**FILED**

**APR 10 2013**

**SECRETARY, BOARD OF  
OIL, GAS & MINING**

**Attn: James T. Jensen, Board Chairman**  
**Re: Request for Agency Action**  
**Docket No. 2013-012 Cause No. 139-103**

Crescent Point Energy U.S. Corp. ("Crescent Point"), successor to Ute Energy Upstream Holdings LLC by way of merger on November 29, 2011, owns significant oil and gas leasehold within and adjacent to the "Subject Area" that is defined in the above captioned Request for Agency Action as set for in Docket Number 2013-012, Cause Number 139-103 (the "Request") as proposed by Newfield Production Company ("Newfield").

Crescent Point strongly supports the Request and encourages the Board to approve Newfield's application in its entirety. The proposed 1280 acre Pilot Spacing Units for the Wasatch formation is attractive to Crescent Point, as the longer lateral length of the wellbore will ultimately result in the drilling of less wells to fully develop the resource and access the same, or possibly more, oil and gas reserves. The drilling of fewer wells for the same amount of resource produced has many benefits to all interest and stake holders that includes, but is not limited to, less surface disturbance.

Thank you in advance for giving Crescent Point's opinion on the matter consideration.

Sincerely,  
CRESCENT POINT ENERGY U.S. CORP.
